FLOWERS

Green greetings everyone,

Of all the choices you could make about your company's promotional products, we're so happy you're choosing to be sustainable and eco-friendly. Details like these are what separate you from the pack of companies who merely talk about 'going green' - and we congratulate you for walking the walk.

I am so excited for this opportunity to introduce you to Botanical PaperWorks, a company that prides itself on the same eco-commitments you do.

If you're not sure what we do, the answer is simple: We make seed paper. Each sheet is handmade using recycled and post-consumer materials that in turn become business cards, notebook covers, calendars, and various other promotional pieces that are not only eco-friendly, but also memorable and valuable to everyone who receives them.

At the end of each product's lifecycle, the seed paper it's made from can be planted - and it's incredibly easy to grow! You'll start to see the sprouts in the first couple of days, and in just a few short weeks you'll be enjoying wildflowers, herbs, or even vegetables. As the seeds sprout, the paper biodegrades at a rapid rate - creating beauty without leaving any waste behind. It's pretty simple, but once you've held one of these products in your hand, you'll never forget it.

We'll work with you personally to help design and produce the custom promotional piece that will make the biggest impact with your audience. During our 15 years in business, we've worked with clients like Starbucks, McDonald's, lululemon, and Pepsi to create innovative promotional products with worldwide reach. When you work with our team, you're getting the best of both worlds: the personalized attention of a Canadian company that cares, with multinational experience with top tier clients.

Let's work together to make this world a greener place, one step and one greeting card or bookmark - if you will - at a time. Let's continue to work together to spread flowers and spread the word about our commitment to the environment.

Wishing you much growth in your promotions (and gardens),

A handwritten signature in blue ink that reads "Heidi". The signature is fluid and cursive, with a small mark above the 'i'.

Heidi Reimer-Epp

President

Botanical PaperWorks

GETTING STARTED

Working with seed paper is easy. We promise.

You already know that you want to create an eco-friendly promotional piece that will be innovative and memorable. Your biggest decision will be deciding between a product that is 100% plantable or one with a plantable piece. Here's everything you need to know to make the best choice.

Seed paper is made using recycled, post-consumer materials and will leave no waste behind when planted. Everything from the 100% post-consumer materials journal pages, 100% post-consumer materials cardboard backing on our journals and notepads, to biodegradable corn plastic packaging is all thoroughly examined for how it impacts the environment.

100% PLANTABLE PRODUCTS

- Made entirely from seed paper, the whole piece can be planted and will biodegrade as flowers bloom
- Lots of value for the recipient when they see a fully plantable piece
- Lots of value for your company - an extremely affordable printed piece that also promises flowers
- High quality printing of your full color, custom artwork printed right on the seed paper
- Plenty of room to print your message - especially good for promotions with lots of detail or a code
- Several light color seed paper options to choose from (see the full color listing on Page 61)

PRODUCTS WITH A PLANTABLE PIECE

- A seed paper shape is adhered to a promotional piece backer - simply remove the seed paper and plant
- Often a more cost-effective option, while still remaining eco-friendly
- Dozens of seed paper shapes to choose from - or we can help you create a custom shape
- Design your promotional piece and decide where you'd like the seed paper shape to be featured
- Send us your custom artwork and we'll do the rest
- Choose from several designer seed paper colors (see the full color listing on Page 61)
- Backer is printed on eco-friendly paper stock made from post-consumer materials

SEED PAPER

is a special paper embedded with wildflower, herb or vegetable seeds. When you plant the paper in a pot of soil or outside in a garden, the seeds in the paper germinate and grow into plants. This special paper is made by Botanical PaperWorks and is tested for purity and germination.

It is the only seed paper tested and approved by the CFIA and the USDA for planting in the United States, Canada and Europe, as well as many other countries world-wide.

CORPORATE EVENT STATIONERY

Plantable Menus and Programs

PLANTABLE MENUS AND PROGRAMS

Make your next event an eco-friendly one by choosing menus and event programs that are good to the environment. Because these products are printed on seed paper, your attendees can save the pieces, take them home and plant in a pot of soil. As the flowers grow, they'll have a blooming memento of the special event.

Custom sizes are always available. If you have something specific in mind, contact us. We'll be happy to help!

Plantable Personalized Corporate Golf Invitation (LEFT) and Golf Favor Flat Card (RIGHT)

GOLF EVENT LINE

GOLF EVENT LINE

Eco-friendly golf tournaments are popular, and this line of seed paper golf promotional products helps you be green with the paper portion of the event. All three products in the collection are printed on paper made with post-consumer material and embedded with wildflower seeds. When the event is over, golfers can plant the paper to grow flowers and leave no waste.

Seed Paper (assorted colors)

PAPER & ENVELOPES

Plantable Seed Paper | Envelopes | Card Stock

PLANTABLE SEED PAPER

Choose from a wide variety of seed paper colors when preparing your plantable promotion. All of the colors to the right are handmade and high quality - sure to make your promotional piece look its very best. The texture is unforgettable, yet suitable for printing and ideal for creating a long-lasting impression.

What's In The Seed Mix?

All of the prices quoted in the catalog are based on the wildflower seed blend. Included in this most-popular blend are the following: Bird's Eye, Clarkia, Black Eyed Susan, Sweet Alyssum, English Daisy, Catchfly, and Snap Dragon

Custom Seed Blends

Wildflowers not your thing or looking for a specific seed to tie into your campaign? Other seed paper is always available. Some of our most popular non-floral seeds are single herb or blends such as basil, dill, and parsley. We also have a variety of vegetable seed options like carrots, tomatoes, and lettuce. Please contact us for assistance and pricing. We charge \$75 to create a new blend, produce a sample and do germination testing. And there is a minimum product order of the equivalent of 500 11" x 17" sheets of seed paper.

Custom Seed Paper Colors

If you're looking for a specific color, we can help. An additional \$100 charge will apply, but we will work together to create a color that's just right for you.

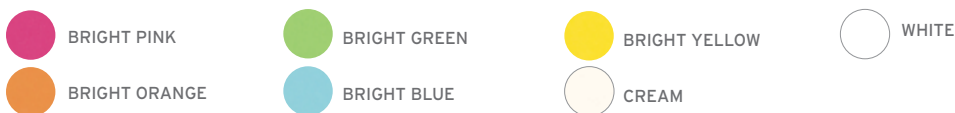

ENVELOPES

All of our seed paper greetings come with envelopes included in the price, or as an add-on. With a variety of vibrant options, you're sure to find an envelope color to suit your custom piece perfectly. Looking for a specific color? No problem. Contact us and we will help as best as we can to provide your ideal color.

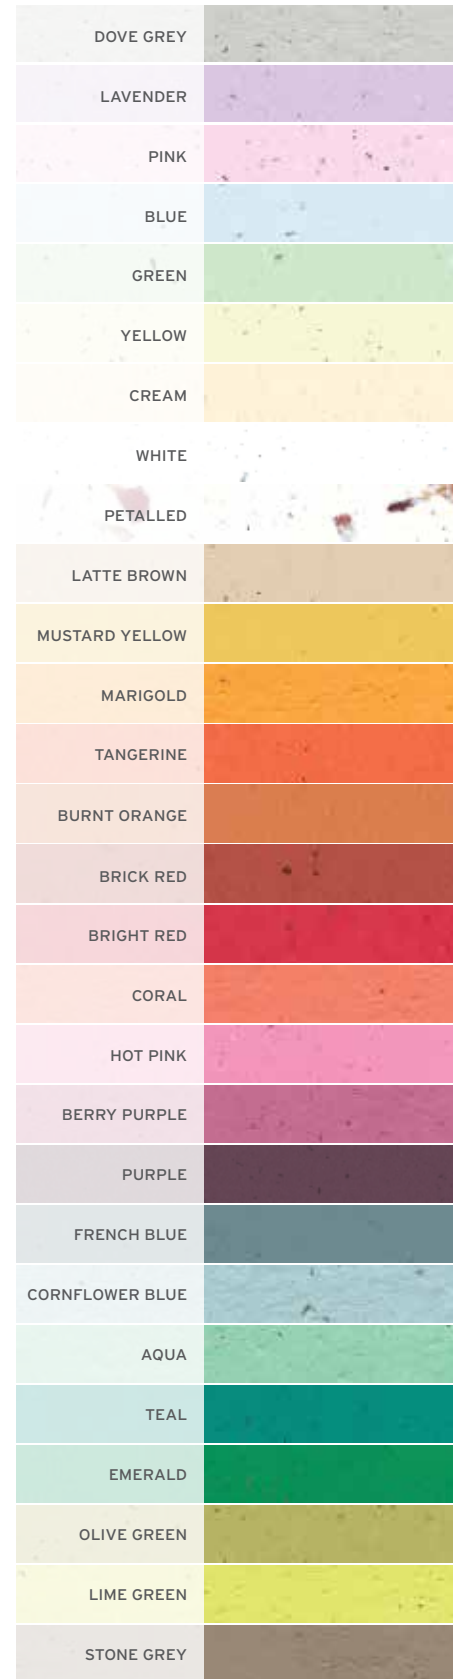

CARD STOCK

Designing a custom piece for a seed paper shape? Look below for all of the cardstock options available. All of them are made using post-consumer materials, and have been carefully considered for their eco-consciousness. And as always, if you have something specific in mind, just contact us - we are happy to work together and provide a quote for custom cardstock selections.

Seed Paper Colors

ORDER INFORMATION

We are here to help make your special project perfect. Please contact us with your questions and project ideas.

SAMPLES

We are happy to provide samples of some of our most popular pieces or specific items upon request. Additional shipping costs may apply.

PRICING

The pricing you see throughout this catalog is based on the following:

- Full-color printing, with bleed (in most cases)
- Standard ink coverage - no more than 30%
- Trimming and assembly, if applicable
- White plantable paper

There are many other paper options available at an additional cost. To see this selection visit Page 61.

Pricing does not include freight or insurance to ship the order.

SET-UP FEES

A \$35 set-up fee will be added for single sided artwork, and \$50 for double sided artwork. Additional changes to the layout may incur a charge of \$25 per proof.

PROOFS

To begin the proofing process, we require:

1. Confirmation of the order and prepayment
2. Your custom artwork or logo

Digital proofs via email will then be provided within 24 hours. This service comes at no additional charge, unless there are significant changes to the design and further proofing is required.

HARD COPY PROOFS

A printed hard copy proof can be provided prior to printing or ordering. This process does increase the production timeline, but will provide the best possible assurance that your design will print exactly as you envision it. Hard copy proofs are printed on an untrimmed sheet of seed paper with crop marks. Set-up charge(s), a \$10 print fee, as well as shipping costs will apply.

ASSEMBLED SAMPLES

Should a full mockup of your custom artwork or packaging be required (assembly and die-cutting included), an additional charge of \$75 for set-up will be applied. If a custom die shape is needed, we can help with that too. To ensure smooth-running production, any custom die shapes will need to be ordered 2 to 3 weeks in advance of printing.

COLOR MATCHING

We do our very best to ensure that every promotional piece printed matches your corporate colors. For the best accuracy, a Pantone number from the uncoated library should be provided.

TIMELINE & TURNAROUND

Average turnaround time is approximately 5 to 10 business days from the time of proof approval on orders up to 5,000 pieces. Larger scale orders (up to 10,000 pieces) may require more time. Once your proof is approved and payment is received, we will work with you to establish an ideal timeline. If you require a faster timeline, additional rush fees may apply.

SHIPPING

All orders ship using either FedEx or UPS. We'll work together to find the solution that's best for you. All we need to know is when you need your order by, and we'll ensure that it gets there on time.

INTERNATIONAL SHIPPING

When it comes to seed paper product traveling around the world, we have a lot of experience to provide you with peace of mind that your products will arrive where and when they need to be. Just let us know where you would like to ship to, and we'll make sure that any additional permits, certificates, and information are in place to get it there with ease. International shipping does require extra time and charges, but we do our very best to make it all go as smoothly as possible.

CUSTOM PROJECTS

CUSTOM SIZES, SHAPES & PRINTING

Seeing great ideas come to life is what we do. Seed paper is such a versatile and creative medium for promotional products. If you have an idea you'd like to discuss, contact us! We're happy to work with you and help make it happen.

CUSTOM SEED BLENDS

All of the prices in this catalog are based on white wildflower seed paper. If you have something special in mind, just let us know - and we'll let you know if there will be additional costs involved. Herbs such as dill, basil, parsley, chive, and mint are all common, as are vegetables like carrots, tomatoes, and lettuce. As long as the seed is small enough (and doesn't count as a weed), we'll try our hardest to make it work for you.

ARTWORK GUIDELINES

To get the best print results every time, here are some helpful tips for designing your piece.

TEMPLATES

Product templates are available, and can be emailed to you in PDF format - then edited using design software such as Adobe Illustrator or InDesign.

If you are implementing a seed paper shape into your design, full-size JPEGs of those shapes are also available for placement.

PLANTING INSTRUCTIONS

We recommend including planting instructions in your artwork. For example: *Plant and grow. Cover the seeded paper with soil. Place in a sunny spot and water often. Watch wildflowers bloom!*

If you require any assistance in writing instructions, contact us or visit www.botanicalpaperworks.com for more information.

PAPER STOCK PRINTING GUIDELINES

PRINTING ON CARDSTOCK

- Full-color CMYK printing is included in pricing. Check product listing to see if bleed is available.

PRINTING ON SEED PAPER

- Pricing includes up to 30% ink coverage.
- Solid dark printing is not recommended, but is not impossible.

PRINTING ON COLORED SEED PAPER

- All colors (including Pantones) will print differently when inks mix with a colored paper instead of white.
- Color matching is not guaranteed on colored seed paper.
- Darker, one- or two-color printing is recommended.

APPROVED FILE FORMATS

PDF

- PDFs need to be the highest resolution possible (at least 300ppi/dpi).

Adobe Illustrator, InDesign, or Photoshop & EPS

- Must be sent as CS3 or lower.
- All outlines and rule lines must be on an unlocked layer, or removable.
- All fonts used in the artwork need to be sent with the artwork, or converted to paths.
- Links (logos and/or images used in the artwork) need to be sent with the artwork as a high resolution PDF/JPEG (at least 300ppi/dpi).

FILES SENT IN WORD, POWERPOINT, OR EXCEL ARE NOT RECOMMENDED.

FILE PREPARATION

There are a few common things to be considerate of when preparing files for print. Continue reading to see how to prepare your custom artwork for optimal printing.

SIZE & BLEED

- When designing the piece, set the file/document size to the actual size of the piece you ordered.
- When using bleed, please add at least 0.125" of bleed on each side. Your file will be set up larger than the actual size of the piece. For example: the file size for a 2" x 3.5" business card with full bleed would be 2.25" x 3.75".

MARGINS

- Make sure the artwork has a margin of at least 0.125" from the inside of all edges, with no text or important image components going into this area.
- We always take great care when printing, however, because of the bumpy texture of the plantable paper, please allow for slight shifting in your design. Avoid using a rule line (a border that follows the edge of the paper).

RESOLUTION

Please send images, logos, and all custom artwork with a resolution of at least 300ppi/dpi at 100% size.

COLOR

- Please use CMYK numbers or four-color process Pantone (PMS) numbers. If RGB or other Pantone numbers are used, we cannot guarantee the accuracy of the color output.
- If submitting artwork, please provide an uncoated Pantone number for best color accuracy.
- Please be advised that if printing on colored seed paper, all colors (including supplied Pantones) will print differently than they would on white - simply because the inks can mix. For example, a yellow logo printed on blue seed paper may look green.

CROP MARKS

- Please submit the artwork without crop marks.

SEED PAPER AT WORK

In February, we planted a piece of seed paper right here in our very own offices at Botanical PaperWorks. The piece wasn't large at all, just a little bigger than a business card. As you can see from these photos, we had great success!

Within a week, we were seeing little sprouts - and a few weeks after that, we had a whole bunch of buds and blooms. Before we knew it, we had enough flowers to make a delicate yet full bouquet.

We often get asked if the paper really grows, and to that we always proudly proclaim, "yes." It's really easy, too. Just plant your seed paper piece under a thin layer of soil, keep it moist and in a sunny spot (inside or out), and watch it grow!
